Commonbond

Commonbond is a Fintech startup company based in New York City. They are attempting to cut down the student loan debt crisis in America. The Student loan debt total in 2019 was 1.41 trillion. Commonbond's engineering team build an application that analyzes students risk according to their credit score, their w-2's, credit history, along with the finance market interest rates, and multiple other financial markets to aggregate data to derive a decision if they would like to do business with students.

Commbond's Engineering team is fairly small. The company has approximately 110 employees and maybe 30 engineers onsite and offsite. To retain employees, they offer great perks like: Comprehensive Healthcare, Unlimited vacation, Student load Reimbursement, Paid parental leave, Volunteer time off and equity ownership.
